ABSTRACT

The Revised Annual Action Plan 2021 is a revision of the programmes, projects and activities proposed for implementation from January till December 2021. However, a mid-term revision is required by law hence the preparation of this revised AAP. It is an integration of annual action plans submitted from Departments of the Assembly and the 2021 extract from the Medium-Term Development Plan (MTDP) 2018-2021 of the Ketu South Municipal Assembly.

The Ketu South Municipal Assembly established by LI 2155, 2012 is one of the eighteen (18) Administrative MMDAs in the Volta Region of Ghana. The Municipality covers approximately a total land area of 279.64sq. km and shares boundaries with the Republic of Togo in the east, Gulf of Guinea in the south, Keta Municipal and Akatsi South District in the west, and Ketu North Municipal in the north. Its population, according to the 2010 PHC, stood at 160,756 representing 53% females and 47% males. The population is projected to increase to 214,409 by the end of 2021. The Municipality is made up of over 400 communities clustered into five (5) Zonal Councils namely Aflao, Some Wego, Some Fugo, Aflao Wego and Klikor.

The Municipality is dominated by agriculture economy and this accounts for over 60% of its population. The main agriculture products are maize, cassava and vegetables. The inhabitants are also engaged in other commercial activities which are dominated by the women. There are deficiencies in socio-economic infrastructure and these in the end frustrate local economic development. The major development challenges in the Municipality include low agricultural productivity, weak local resource mobilization for local economic development, weak capacity to control the human settlement development, inadequate infrastructure to meet equitable access to quality education and healthcare at all levels, and sanitation management.

As part of the implementation arrangements, the following implementation steps are highly anticipated:

- Defining milestones as well as monitoring and evaluation indicators. The indicators should be easy to assess and understood by participating groups.
- Outline activity schedule and procedures including financial disbursement schedules.
- Assigning responsibilities.
- Clarify monitoring and evaluation as well as reporting systems.
- Organize community meetings for projects implementation.
- ❖ Setting up systems for smooth operation and maintenance of the projects once it is completed.
- * Revise and update data for planning and budgeting based on the outcome of monitoring and evaluation of programmes/projects.

CHAPTER ONE: GENERAL INRODUCTION

1.1. INTRODUCTION

This Plan is based on the planned activities for 2021 in the Medium-Term Development Plan (MTDP) 2018-2021 of the Ketu South Municipal Assembly. Thus, it is the revision of 2021 extract of the respective work plans in the MTDP 2018-2021 and departmental action plans.

1.1.1. Our Mission

Our mission is to make a positive change in the Ketu South Municipality by mobilizing available fiscal, material and human resources for an efficient and effective delivery of social, economic, political and cultural services through the application of science and technology and transformational leadership.

1.1.2. Our Vision

The Ketu South Municipal Assembly envisions to be the best managed and decentralized Assembly delivering superior client-oriented services.

1.1.3. Our Core Values

The values of the Assembly are embedded in Hard Work, Discipline, Integrity, Transparency, Professionalism, Client Focus, Accountability, Equity, Honesty, Participation, Trust and Good Governance. We regard good governance and public-private partnership as essential to holistic development. We are also committed to the sustenance of our traditional institutions and the natural environment.

1.2. MUNICIPAL DEVELOPMENT PROFILE

Ketu South Municipality serves as the Eastern (International) Gateway to the Republic of Ghana. The Municipality is unique in the sense that its Capital Aflao/Denu shares direct boundary with Lome the Capital of the Republic of Togo. Thus, it serves as the most pronounced ground crossing border in West Africa, if not Africa. Due to its cosmopolitan diversity, the Municipality is referred to as the Volta Region's Settlement Microcosm. The Ketu South Municipality was formerly created by an Act of Parliament in 2007 through the Legislative Instrument (LI) 1897 of 2007 which split Ketu into Ketu North and Ketu South. In 2012, Ketu South Municipality was elevated to a Municipal status through LI 2155 of 2012. The Municipality has an administrative establishment known as Ketu South Municipal Assembly. It is the highest administrative and planning authority in the Municipality. The Municipal Assembly has a law and policy making body made up of 57 Assembly Members.

1.2.1. Physical and Built Environment

a. Location and Size

Ketu South Municipality is one of the eighteen (18) municipalities/districts in the Volta Region of Ghana. The Municipality is located at the south-eastern corner of Ghana. It shares boundaries with the Republic of Togo to the East, Keta Municipality to the West, Ketu North

Municipal to the North, and Gulf of Guinea to the South. The Municipality has a total land size of approximately 279.64 sq. km representing 3.8 percent of the regional land area and lies within latitudes 6⁰ 03'N and 6⁰ 10'N, and longitude 1⁰ 6'E and 1⁰ 11'E. The Municipality is strategically located with added advantage as the Eastern Gateway to Ghana where continuous cross-border activities are carried out on daily basis. The location of the Municipality to the main Ghana-Togo boarder coupled with its socio-economic potentials brings to the fore some critical development opportunities for investors to tap in.

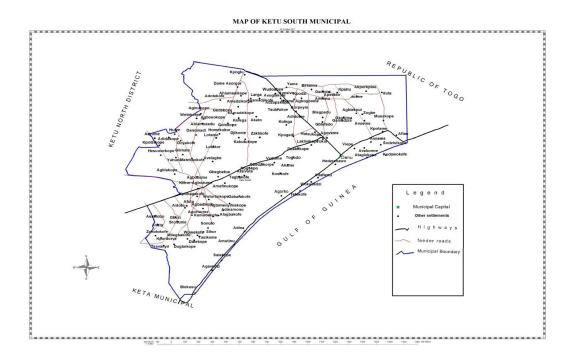

b. Topography and Drainage

Ketu South Municipal is a relatively low-lying area with altitudes ranging from less than 15 metres at the coast and increasing to 66 metres inland. The coastline is fairly smooth and marked by sandbars. The Municipality is endowed with about 30km stretch of wetlands/lagoon, extending from the Keta lagoon at Blekusu to the environs of Aflao, which provides opportunities for aquaculture activities, eco-tourism, development of green belt, and salt mining.

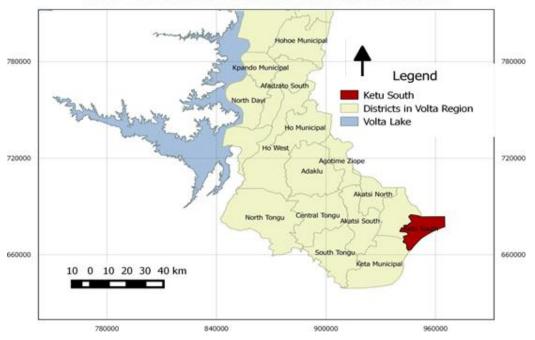

These lagoons occasionally get flooded resulting into destruction of property and rending inhabitants homeless with its social implications. Poor drainage of the Municipality places a lot of limitation on agriculture development especially in the promotion of dam construction for irrigation activities. However, the lagoons in the municipality have the potential for economic development and employment generation.

c. Climate

The Municipality falls within the dry coastal savanna climatic zones. Average monthly temperatures vary between 24°C and 30°C, which are generally high for plant growth throughout the year. Mean annual rainfall in the municipality is 850mm at the coast increasing to 1,000mm inland. It experiences double maxima of rainfall occurring from April to July and September to October. The dry season, which is dominated by the dry harmattan winds, extends from December to February. Generally, rainfall in the Municipality is considered low and erratic particularly along the coastal strip between Agbozume and Aflao during the minor season. The low rainfalls couple with the soil type found in the Municipality account for the low agricultural productivity and interest. This phenomenon makes the municipality dependent on other districts for food supply. It places a lot of limitations on the capacity to develop dams to support agriculture development. In the lean season the Municipality depends on food importation from the republic of Togo to supplement food supply from other parts of Ghana.

KETU SOUTH MUNICIPAL IN A REGIONAL CONTEXT

d. Vegetation

The original vegetation of the Municipality is Coastal/Guinea Savannah Woodland made up of short grassland with less clumps of bush and trees found mainly in the northern part. There are however coastal scrub, grassland and mangrove forests in marshlands in the south.

e. Population

The 2010 Population and Housing Census recorded a total population of 160,756 with females dominating by 52.9 percent constituting 7.6 percent of the Volta Region's population. With the growth rate of 2.4 percent, the population is projected to increase to 214,409 by the end of 2021. This high population growth is largely attributed to the influx of immigrants mainly from

nearby countries (Togo, Benin, Nigeria and Niger) who engage in commercial activities in the Municipality or transit through to other parts of West Africa.

Table 1: Projected Population of Ketu South Municipal (2017-2022)

YEAR	TOTAL	MALE	FEMALE	REMARKS
2010	160,756	75,648	85,108	Actual
2017	189,307	92,869	96,435	Projected
2018	193,549	95,132	98,417	Projected
2019	198,051	97,407	100,644	Projected
2020	202,614	99,709	102,905	Projected
2021	214,409	100,896	113,513	Projected
2022	219,618	103,347	116,271	Projected

Source: Ghana Statistical Service, 2010 Population and Housing Census.

f. Road Network

The Municipality can boost of approximately 160km of road network, consisting of highways (27km), urban roads (28km) and feeder roads (103km). Out of these roads, a distance of 20km has been asphalted whiles 16km is bitumen surfaced. Also, almost 81km of roads are graveled/shaped. Of much concern is the remaining stretch of feeder roads (43km) which are not motorable particularly during rainy season.

g. Water and Sanitation

Although the Municipality has a few fresh ground water bodies, it is endowed with abundant underground water. Thus, almost all potable water available to the populace is sourced from high yielding underground water systems known as Small Town Water Supply Schemes. Notable among these are the Coastal Communities Water Supply Scheme (which stretches from Aflao/Denu to Blekusu), Nogokpo Communities Water Supply Scheme, and Klikor Communities Water Supply Scheme. Management of these schemes falls under the supervision of Community Water & Sanitation Agency (CWSA) except that of Aflao which is directly managed by Ghana Water Company Limited (GWCL).

The Municipality like other municipalities in Ghana continues to face sanitation management challenges, especially with regards to solid waste. In spite of the fact that there is no readily available data on waste generation in the municipality, Aflao still remain on top of the list due to the influx of thousands of migrants and brisk commercial activities in the municipal capital on daily basis. However, structures are in place to manage the situation and prevent any disease outbreak of public concern.

1.2.2. Economic Environment

i. Municipal Economy

According to the 2010 Population and Housing Census, most of the inhabitants derive their livelihood from agriculture and trading. The only heavy industries in the Municipality are Diamond Cement Factory and Seven Seas, salt mining, Co. Ltd at Aflao and Adina respectively. The Municipality economically links other major marketing centres in neighbouring Municipalities. A critical trend of commercial interconnecting symbiosis that has developed all these years between the Municipality on one hand and Ketu North Municipal and

Akatsi South District on the other hand is worth harnessing for economic development in the southern enclave.

Besides, the concept of Local Economic Development (LED) as a model of Local Development is gradually gaining recognition in the municipality. The thrust of the Municipality in promoting LED is to embark on measures aimed at identifying the key stakeholders through whom partnerships could be fostered to promote effective utilization of the identified resources for effective exploitation, which could lead to large scale job creation for improved living conditions of the people. Although some measures have been put in place to enhance LED, it is also to identify the immediate bottlenecks to current economic growth and design measures for improvement.

ii. Banking Services

There are five (5) Commercial Banks in the Municipality. These are Ghana Commercial Bank (GCB), United Bank of Africa (UBA), ECOBANK and GT Bank all located at Aflao, and the Agricultural Development Bank (ADB) at Denu. There is also a branch of the Avenor Rural Bank and Unity Rural Bank at Denu and Aflao respectively. In addition, credit and loans schemes are available across the municipality to support economic activities. These financial institutions provide credit to promote agricultural production as well as commercial activities in the municipality. However, large sections of the population lack access to credit because of the strict collateral requirements and most especially weak entrepreneurial acumen.

iii. Kente Weaving Industry

Artisanal kente weaving is a predominant economic activity of most people, especially in the Agbozume-Klikor community. The artists produce indigenous kente products which are sold mostly in the Agbozume market. The final products (full pieces of kente cloths) are bought by traders from all parts of Ghana, and neighbouring countries such as Nigeria, Togo and Benin. Prospects for large scale production and foreign exchange earnings abound in this industry.

iv. Artisanal Salt Mining Industry

Artisanal and small scale salt mining is one other major economic activity for the people specifically at Taskcorner, Adina, Agavedzi, Blekusu, Amutinu, Dogbekofe, Sonuto, Tagbato, Kpedzakofe and Dzaglame. This activity is usually carried out during the sunny period when the lagoon is drying up. There is therefore the need to harness this less developed industry in a sustainable manner that the ultimate beneficiaries will be the local people.

v. Tourism Potentials

There are great potentials for tourism development in the Municipality. Significant among them are the coastal sea shore for natural beach and hotel development, large tracks of lagoon land with potential for eco-tourism, vibrant kente weaving industry, rich traditional festivals and a promising hospitality industry. There are a number of beach fringes with coconut trees along the coastline stretching from Aflao to Blekusu. These beaches are potential tourist sites for holiday makers. The astonishing proximity of the municipality to Lome, Togo is yet another strength that can be harnessed for sustainable tourism development. One sure way to take advantage of these rare economic potentials by the Assembly is to adopt and implement the

findings and proposals of a research work carried out by a team of American/European researchers in 2011 titled 'Ketu South Tourism and Development Strategy.

vi. Agriculture

The 2010 Population and Housing Census attests that the agricultural sector in the Ketu South Municipality is the most single important economic sector, employing over 18 percent of the labour force. It is worth noting to consider the following sub-sectors of agriculture:

a. Coconut Plantations

Coconut is the largest plantation crop grown in the municipality. Large contiguous plantations are evident all along the coast. There are mixtures of coconut varieties grown all over. Farmers depend on their trees for their seed source since there are no seed producing centres. The result is poor rate of germination. The coconut fruits are either harvested fresh for direct and crude consumption or as copra for processing into oil based on local crude technology. There used to be a vibrant coconut oil extraction factory in the Municipality, which collapsed a couple of decades ago. The dilapidated structure still exists. The Assembly is strongly committed to revamp this factory through Public-Private-Partnership.

b. Urban Vegetable Production

Even though there is a general vegetable production throughout the Municipality as a way of life, actual vegetable production as a business, known as urban gardening, is concentrated along the coastline. The traditional production areas include Aflao, Awakorme, Viepe, Denu, Hedzranawo, Adafienu, Wokadedzi, Tetekope, Agorkor, Nogokpo and Agbozume. The vegetables produced are onion, chilies, okro, tomatoes, carrot, leafy vegetables (Gboma) and butter nut. The urban gardening business is an all-year-round activity with water obtained from shallow tube wells mechanized by electrically operated water-pumping machines or petrol operated ones. The farming practices involve extensive land preparation and application of chemicals for pest and disease control. An average land size of 1 acre is usually obtained through leasehold or rent. Standard packaging of the crops so as to improve upon the value chain process in order to increase incomes of the farmers still remain a major challenge to the business.

c. Fisheries Sub-Sector

The fisheries sub-sector accounts for about 30 percent of the agricultural activities in the municipality. It is solely an outboard motor-powered canoe marine fishing business by indigenous fishermen, which stretches from Aflao all the way to Blekusu.

Pelagic fish species such as Anchovy and Sardine are caught throughout the year with the peak season from August to October. The catches have been experiencing decline over the years due to poor management and over exploitation of the marine resources. The lagoon on the other hand also has the potential to be developed into fishing sites for prawns and shrimps.

1.2.3. Social Environment

i. Education

The Ketu South Municipality has 230 public basic schools and 181 recognized private basic schools. The table gives a vivid description of distribution of schools.

Table 2: Educational Circuits and Number of Schools

iii. Sports and Recreation Development

The provision of sports facilities in the municipality is a major constraint in the promotion of sports. It has not been given any serious attention except for sporadic and uncoordinated assistance to schools. There are other challenges to sports development including finances. Sports development and promotion is a very expensive venture and the reliance and competing demand on the Assembly's resources is a serious constraint to sports development. Potentials and interest for sports in the municipality however exist. There are a number of football and other sports clubs across the municipality and external support is therefore needed to advance the course of sports promotion and development. A modern sports stadium has been explicitly proposed in the Medium-Term Development Plan 2018-2021 of the Assembly.

iv. Cultural Development

The municipality abound in numerous traditional believes, values and practices; systems of ownership, language and history. Common cultural heritage can be identified as running through. There are positive as well as negative aspects of the culture which can be harnesses for economic and social development. A lot of resources and efforts will be needed to promote cultural development in the municipality. The Assembly, on behalf of municipality, is ready to enter into meaningful sister city relationship(s) and partnership with cities across the world in order to leverage its rich culture for development.

1.3. MUNICIPAL INVESTMENT / BUSINESS DEVELOPMENT POTENTIALS

Based on the Development Profile of the Municipality, the following proposed business development areas are worth investing in:

- i. Agriculture development / modernization
- ii. Aquaculture Development, in the lagoon

iii. Industry

- Establishment of medium-size pack house to package vegetables
- Establishment of coconut oil & by-products production factory
- Establishment of modern & regulated indigenous small scale salt mining enclaves

iv. Tourism

- Establishment / development of hospitality infrastructure hotels, restaurants, recreational and medical centres, roads
- Packaging & marketing of tourist potentials beaches and Lagoons, Aflao-Lome border, cultural festivals and heritage

v. Waste Management

- Establishment of waste treatment plants (solid and liquid)
- Introduction of waste collection technologies

1.4. DEVELOPMENT ISSUES, GOALS AND OBJECTIVES

Issues, adopted policy objectives and strategies from the medium term, which have implication for the 2021 fiscal year are detailed in the table below:

Table 6: Issues, Objectives, Strategies and Global Linkages

No.	Adopted Development Issues	Adopted Policy Objectives		Adopted Strategies & Global, Regional Linkage				
Dev	velopment Dimension: Eco	onomic Development						
1.	Limited availability and accessibility of economic data.	Ensure improved fiscal performance and sustainability.		Enhance the production and dissemination of disaggregated data (SDG Target 17.18).				
2.	Limited local participation in economic development.	Pursue flagship industrial development initiatives.	3.1	Implement One district, one factory initiative (SDG Targets 9.2, 9.3, 9.4, 9.b, 9.c).				
3.	Limited access to credit by SMEs.	Support Entrepreneurs-hip and SME Development.	4.1	Mobilise resources from existing financial and technical sources to support MSMEs (SDG Targets 8.10, 9.3).				
4.	Poor tourism infrastructure and Service.	Diversify and expand the tourism industry for economic development.	5.1	Promote and enforce local tourism and develop available and potential sites to meet internationally acceptable standards (SDG Target 8.9).				
5.	Low level of irrigated agriculture.	Improve production efficiency and yield.	7.1	Implement Government's flagship intervention of 'One village One dam to facilitate the provision of community-owned and managed small-scale irrigation (SDG Targets 1.1, 1.4, 1.5, 2.3, 2.4).				
6.	Low levels of private sector investment in aquaculture (small-medium scale producers)	Ensure sustainable development and management of aquaculture.		Promote the use of irrigation systems and other impounded reservoirs for aquaculture and promote mariculture (SDG Target 14.4).				
Dev	velopment Dimension: Soc	cial Development						

No.	Adopted Development Issues	Adopted Policy Objectives		Adopted Strategies & Global, Regional Linkage
1.	Inadequate funding source for education.	Enhance inclusive and equitable	1.1 & 2.1	Continue implementation of free SHS and TVET for all Ghanaian children (SDG Target 4.1).
2.	Inadequate and inequitable access to education for PWDs and people with special needs at all levels.	access to and participation in quality education at all levels.	3.1	Ensure inclusive education for all boys and girls with special needs (SDG Targets 4.1, 4.2, 4.5, 4.a).
3.	Gaps in physical access to quality health care.			Accelerate implementation of CHPS policy to ensure equity in access to quality health care (SDG Targets 1.2, 1.3, 3.1, 3.2, 3.3, 3.8, 16.6).
4.	Lack of comprehensive knowledge of HIV and AIDS/STIs, especially among the vulnerable groups.	Ensure the reduction of new HIV and AIDS/STIs infections, especially among the vulnerable groups.	5.1	Intensify behavioural change strategies especially for high risk groups for HIV & AIDS and TB (SDG Targets 3.3, 3.7)
5.	Inadequate access to water services in urban and rural areas.	Improve access to safe and reliable water supply services for all.	6.1	Provide mechanized borehole and small town water systems (SDG Target 6.1).
6.	Low awareness of child protection and family welfare laws and policies.	Ensure effective child protection and family welfare system.	7.1	Increase awareness on child protection and family welfare (SDG Targets 5.3, 16.2, 16.3).
7.	Unfavorable socio- cultural environment for gender equality.	Attain gender equality and equity in political, social and economic development systems and outcomes.	8.1	Introduce measures to promote change in the socio-cultural norms and values inhibiting gender equality (SDG Targets 5.1, 5.2, 5.3, 10.2).
8.	Youth unemployment and underemployment among rural and urban youth.	Promote effective participation of the youth in socioeconomic development.	9.1	Build integrated youth centre to serve as an information hub for youth development (SDG Targets 16.6, 16.7). Support the youth to participate in modern
9.	Inadequate apprenticeship opportunities.	Promote the creation of decent jobs.		agriculture (SDG Target 8.6) Develop and promote schemes that support skills training, internship and modern apprenticeship (SDG Targets 8.3, 8.6).
Dev	velopment Dimension: Env	rironment, Infrastructure and Huma	ın Set	tlement
1.	Potential rise in sea level resulting in wetland flooding.	Reduce coastal and marine erosion.	2.1	Strengthen the participation of local communities in sustainable coastal management practices (SDG Targets 6.b, 15.c).
2.	Improper disposal of solid and liquid waste.	Reduce environmental pollution.	3.1	Promote science and technology in waste recycling and waste-to-energy technologies (SDG Targets 6.a, 7.1, 12.5).
3.	Poor quality and inadequate road transport network.	Improve efficiency and effectiveness of road transport infrastructure and services.	4.1	Provide bitumen surface for road networks and areas of high agricultural production and tourism (SDG Targets 7.3, 11.2).
4.	Poor drainage system	Address recurrent devastating floods.	5.1	Construct storm drains to address recurrent floods (SDG Targets 9.a, 11.3)
5.	Scattered and unplanned human settlements.	Promote a sustainable, spatially integrated, balanced and orderly development of human settlements.	6.1	Fully implement Land Use and Spatial Planning Act, 2016 (Act 925).

No.	Adopted Development	Adopted Policy Objectives		Adopted Strategies & Global, Regional			
110.	Issues	Adopted Foncy Objectives		Linkage			
6.	Congestion and overcrowding in urban areas.	Promote resilient urban development.	7.1	Prepare and implement structure plans for all grade 1, 2 and 3 settlements (SDG Targets 11.3, 11.b).			
Dev	velopment Dimension: Go	vernance, Corruption and Accounta	bility	1			
1.	Ineffective sub-district structures.	Deepen political and administrative decentralization.	1.1	Strengthen sub-district structures (SDG Targets 16.6, 17.9).

CHAPTER THREE: IMPLEMENTATION ARRANGEMENT

3.1. MONITORING AND EVALUATION

The MPCU in collaboration with the appropriate departments and stakeholders will carry out both traditional and participatory monitoring and evaluation of the programs, projects and activities in the Plan. In the case of evaluations, environmental safety screening forms world be used for all physical projects as ex-ante evaluation. Mid-term review will be don for the AAP as well. Results of these M&E exercises will be reported in the Quarterly and Annual Progress Reports as mandated by law. Findings will be disseminated in same reports as above and shared with National, Regional, District and sub-district (Zonal Councils) stakeholders in the public and private sectors. The twenty (20) national district core indicators, integrated social services (child welfare) / UNICEF, some localized SDG indicators and other district specific indicators will be used to monitor and evaluate the plan. A detailed framework tracking and evaluation of the achievement of activities specified in Chapter Two above in accordance with the NDPC National M&E Manual is shown in Table 8 below.

⁵ Estimate based on the various GLSS Reports indicates that the annual average of new entrants to the labour market is 340,000, excluding discouraged workers. Accounting for discouraged workers would indicate at least 425,000. This implies a minimum of 500,000 jobs is required annually to at least cater for new entrants and some of the backlog...
